Streamline Administrative Functions and Ensure Proper Compliance

This webinar is for you if:

You feel that there are challenges within your time and attendance process to the thousandth of a second.

You spend hours cobbling together data and doing duplicate data entry in order to report students' progress.

You would like a system that can be flexible and safeguard manual manipulation of key punches.

You want a solution that is built to support your unique time tracking requirements.

You have the need for a Point of Sale and/or appointment scheduler.

You're ready to take a more strategic approach to time and attendance.

Join us to learn how you can:

- Easily manage and report on student's time with biometric, swipe card and code punch functionality
 - Save time, improve compliance and stay on top of accreditation/certification rules and regulations
 - Gain real-time visibility into who is scheduled within your schools through access to your computers, tablets and/or mobile devices
 - Manage students' absences and time in one integrated system (GuestVision TimeClock and Diamond SIS)
 - Easily send individual or group student messages
-

Wednesday, October 30, 2024

10:00-11:00 AM (PDT)

12:00-1:00 PM (CDT)

1:00-2:00 PM (EDT)
